

# Základní kurz použití GIT a Jenkins

Kód kurzu: ATBUGJ

Do you Automate tests and do you come into contact with source code editing and continuous integration? If you want to technically specialize in continuous Integration tools within creation of automated tests – This course is for you.

## Pre koho je kurz určený

The aim of this one-day course is to familiarize participants with the theoretical and practical basics that relate to the issue of source code editing and continuous integration / development.

## Čo Vás naučíme

The main goal is to familiarize participants with source code editing and continuous integration / development.

## Osnova kurzu

- We will perform exercises on local Jenkins installations on each participant's PC. For GIT exercises we will use private repositories on GITHUB. We will certainly present you the theory but above all we'll focus on practical exercises. You will get to experience various scenarios that can be found on the projects.

## Requirements

A laptop
