

Firewall 11 Essentials: Configuration and Management

Kód kurzu: EDU-210

Successful completion of this five-day, instructor-led course should enhance the student's understanding of how to configure and manage Palo Alto Networks Next-Generation Firewalls. The course includes hands-on experience configuring, managing, and monitoring a firewall in a lab environment.

Čo Vás naučíme

The Palo Alto Networks Firewall 11 Essentials: Configuration and Management (EDU-210) course is five days of instructor-led training that will help you to:

- Configure and manage the essential features of Palo Alto Networks next-generation firewalls
- Configure and manage Security and NAT policies to enable approved traffic to and from zones
- Configure and manage Threat Prevention strategies to block traffic from known and unknown IP addresses, domains, and URLs
- Monitor network traffic using the interactive web interface and firewall reports

Pre koho je kurz určený

Security Engineers, Security Administrators, Security Operations Specialists, Security Analysts, and Support Staff

Požadované vstupné znalosti

Students must have a basic familiarity with networking concepts including routing, switching, and IP addressing.

Students also should be familiar with basic security concepts. Experience with other security technologies (IPS, proxy, and content filtering) is a plus.

Študijné materiály

Príručka ku kurzu firmy Palo Alto podľa programu kurzu.

Osnova kurzu

- Palo Alto Networks Portfolio and Architecture
- Configuring Initial Firewall Settings
- Managing Firewall Configurations
- Managing Firewall Administrator Accounts
- Connecting the Firewall to Production Networks with Security Zones
- Creating and Managing Security Policy Rules
- Creating and Managing NAT Policy Rules
- Controlling Application Usage with App-ID
- Blocking Known Threats Using Security Profiles
- Blocking Inappropriate Web Traffic with URL Filtering
- Blocking Unknown Threats with Wildfire
- Controlling Access to Network Resources with User-ID
- Using Decryption to Block Threats in Encrypted Traffic
- Locating Valuable Information Using Logs and Reports
- What's Next in Your Training and Certification Journey
- Appendix A - Securing Endpoints with GlobalProtect
- Appendix B - Providing Firewall Redundancy with High Availability
- Appendix C - Connecting Remote Sites using VPNs
- Appendix D - Configuring User-ID Windows Agent
