

# SAS® Macro Language 1: Essentials

Kód kurzu: MC1V2

This course focuses on using the SAS macro facility to design, write, and debug macro programs, with an emphasis on understanding how programs that contain macro code are processed.

| Pobočka    | Dní | Katalógová cena | ITB |
|------------|-----|-----------------|-----|
| Bratislava | 2   | 1 000 €         | 0   |

## Pre koho je kurz určený

Experienced SAS programmers who are familiar with simple SQL queries and well-versed in DATA step processing and who want to write reusable, dynamic programs and automate repetitive processing in SAS

## Čo vás naučíme

- Perform text substitution in SAS code
- Use macro variables and macro functions
- Automate and customize the production of SAS code
- Conditionally or iteratively construct SAS code
- Write self-modifying, data-driven programs

## Požadované vstupné znalosti

Before attending this course, you should have knowledge equivalent to having completed the SAS Programming 1: Essentials and SAS Programming 2: Data Manipulation Techniques courses. Specifically, you should be able to do the following:

- Write simple SQL queries using the SELECT statement.
- Read from and write to SAS tables using a DATA step.
- Use DATA step programming statements, including IF-THEN/ELSE, DO WHILE, DO UNTIL, and iterative DO.
- Use SAS data set options, including DROP=, KEEP=, and OBS=.
- Use character functions, including SUBSTR, SCAN, and UPCASE.
- Read subsets from tables using the WHERE statement.
- Create and use SAS date values and constants.
- Use Base SAS procedures such as SORT, PRINT, CONTENTS, MEANS, and FREQ.

## Osnova kurzu

### Introduction

- Why SAS macro?
- Setting up for this course

### SAS Macro Facility

- Program flow
- Creating and using macro variables

### Storing and Processing Text

- Macro functions

# SAS® Macro Language 1: Essentials

- Using SQL to create macro variables
- Using the DATA step to create macro variables
- Indirect references to macro variables

## Working with Macro Programs

- Defining and calling a macro
- Macro variable scope
- Conditional processing
- Iterative processing

## Developing Macro Applications

- Storing macros
- Generating data-dependent code
- Validating parameters and documenting macros
